

Unique Features of Britannica Resources

This document outlines the features and benefits that are unique to Britannica but that can also compliment other services your Ministry of Education may be planning to use.

Early Years Provision

Britannica compliments other academic databases in that it promotes research from early years upwards. Our Fundamentals area provides audio books and games for those ages 3+ whilst the Foundation level offers safe searching and accessible texts for students up to the age of 11.

Multi-media Content

Multimedia content for every search made. Thousands of Britannica videos and images are accompanied by other 3.5 million rights-free images from over 60 of the world's best image collections in ImageQuest.

Primary Sources

Access any literature texts that are out of copyright as well as over 420,000 e-works of original and primary source documents.

Three Learning Levels

Every student of any age and ability is catered for with Britannica's three different levels. Each article is lexile scored to help teachers and students adapt the level of information for any age or ability. The levels are also applied to all media, journal and ebook content to support all types of research.

Higher Education Tools

A built-in citation tool allows for easy referencing of any content type students use. A personalised My Research area helps students to compile resources from any site in one place.

Learning Support Tools

Britannica offers text-to-speech for HTML articles as well as a double-click dictionary, highlight tool for visual or dyslexic learners and a translation tool to support those developing English language proficiency. At level 1, we offer less confident readers the opportunity to read a section at a time, hiding any irrelevant content and allowing a slower pace.

Teacher Lesson Preperation

Britannica School and Britannica LaunchPacks provide educators with ready made lessons and activities as well as the tools needed to customise and build lessons themselves. Britannica's curriculum team provide CPD training and regular tutorials.

Unique Features of Britannica Resources

Curated Journals

Britannica provides a curated selection of over 500 academic journals from the EBSCO suite. Within that, we offer over half a million articles that are specifically relevant to the territories we work with. These journals are reviewed and placed at the appropriate reading level.

Editorial Team

Britannica has enlisted a team of over 100 educational editors and a network of over 4,000 contributors to develop our educational content. This team ensure that the information is well researched, accurate and appropriate for learners.

Biographies

A digital library of over 30,000 biographies that can be filtered by country, 'known for' and gender so that students can learn about the people who have impacted the world.

Interactive Content

Every level on Britannica offers a range of interactive, dynamic content to engage learners. These are updated regularly and mixed media. We also partner with Kahoot to allow teachers to create their own interactive quizzes..

Subject Specific Digital Library

Subject browse features and curriculum mapping tools in Britannica provide an easy way for teachers and students to explore content relevant to their area of study. The same tools are available for media items and primary sources.

Current News & Updated Content

Britannica is reviewed and updated every 20 minutes to provide the most up-to-date and relevant information to learners. We also have a live feed to EBSCO meaning that our journal content stays refreshed and update. We also include a live News feed to keep students engaged at all levels, with current affairs.

Web's Best Sites

Britannica's team regularly review the internet's best web sites for every search term. This saves students time when carrying out research and provides them with verified options for further research.
